TECHNICAL SKILLS

Languages: JavaScript, Java, TypeScript, Python, HTML/CSS, C, C++, C#, SQL (MySQL, MSSQL), R
Frameworks and Tools: React, Node, Firebase, ASP.NET Core, REST API, Spring Boot, Angular, Bootstrap

EDUCATION

University of Waterloo

Bachelor of Computer Science, Minor in Statistics

Waterloo, CA

Expected Graduation: 2025

EXPERIENCE

Achievers Inc

Software Developer Intern

May 2022 – Aug. 2022

Toronto, ON (Remote)

- Developed a **React** component library with **25+** standardized components to ease the development process
- Migrated external dependencies such as **Material-UI** out of the library by rewriting components which decreased load time by **8%** and made it easier for the architecture team to stage and deploy the library to production
- Completed a wide variety of **30+** Jira tickets ranging from resolving bugs to creating independent components such as Icon and Checkbox Group, and had written documentation about their function and utilization
- Ensured the library met the **WCAG 2.1** Accessibility standards by adding ARIA labels with proper tab indexing to components, and testing their accessibility with JAWS and NVDA screen readers
- Met and exceeded the **80%** coverage threshold of **JavaScript** unit testing by writing **50+** React unit tests to ensure that the components and their attributes are working as expected

SPARK

Software Developer

July 2021 – April 2022

Fremont, CA (Remote)

- Created a multiple choice quiz section using **ASP.NET Core** as the back-end and an **SQL database** for storing the questions which were used in **800+** quizzes taken by students
- Authenticated **200+** student accounts to access quizzes using **ASP.NET Core** with **C#** to validate credentials
- Set up automated emails which sent **2000+** emails to student accounts confirming registration, quiz results, etc.
- Developed an accessible front-end using **React** and **Bootstrap** to educate **500+** children in developing countries
- Reduced load time by **17%** by code-splitting, utilizing CDNs, minifying code and removing unnecessary plugins
- Addressed previous **UX/UI** design issues and standardized all design outputs with a mobile-first approach which increased the satisfaction rate of survey respondents who accessed the website through mobile by **29%**
- Supported **6** new members of the team by having pair coding sessions and providing online resources for learning

CrowdDoing

Data Scientist Intern

May 2020 – Aug. 2020

San Francisco, CA (Remote)

- Collected data of **65+** herbs from different sources including the National Library of Medicine using data crawling techniques through **Python** with libraries such as **Scrapy** and **Beautiful Soup**
- Processed **35+** unstructured data sets through libraries such as **Pandas** and **NumPy** for standardization
- Applied cluster analysis techniques such as **K-means clustering** to classify **100+** items into nutrient categories
- Assisted in the development of a recommender system to suggest items based on user interaction with clusters

PROJECTS

Forex  | *MongoDB, Express, React, Node, Firebase, Tailwind CSS, JWT*

December 2021

- Full-stack **MERN** app featuring a discussion form based on **Firebase** that allows for P2P Currency Exchange
- Uses a **MongoDB** database to store login credentials with an **Express.js** server to handle user authentication
- Utilizes Fixer.io's API to display exchange rates for **170** currencies as recommendations on the dashboard
- Keeps user authenticated in order to retain access to the API and chat by using **JWT** signature verification
- **React**-based front-end is focused heavily on **UX/UI** by using frameworks like **Tailwind CSS** and **PostCSS**

Employee Manager  | *Spring Boot, Angular, MySQL, REST API, Bootstrap*

June 2022

- Full-stack CRUD application which allows for managers to store and edit information about employees
- Utilizes **Spring Boot** in **Java** on the back end to handle the logic related to managing employee data which is stored in the **MySQL** database, along with **Angular** in **TypeScript** and **Bootstrap** in the front end for the UI
- REST controller is to make a **REST API** that uses HTTP requests to access and use data from the server
